RE: Site Inspection, DOE/045/003 - Dolomite Plant and DOE/045/004
-Flux Plant

In February, 1987, Dave Wham, Wayne Hedberg, and I drove by the above referenced operations. Both sites are very large. It is recommended that these sites be given close scrutiny when the proposed rules for the minerals program are implemented.

The Dolomite Plant is active and large off-road haul trucks were observed in operation.

The Flux Plant did not appear to be actively mining. Rumor has it that material is imported to this site for processing.
